EDUCATION

University of California, San Diego

San Diego, CA

Bachelor of Science, Computer Science | GPA: 3.909/4.0

Expected June 2029

- Coursework: Data Structures & Algorithms, OOP, Systems Programming, Software Tools & Techniques, Discrete Mathematics
- Activities: Triton Engineering Student Council (VP Internal), CS & Engineering Society, ACM

EXPERIENCE

IDX Exchange

Software Development Engineer Intern

June 2026 – September 2026

- Built a **Zillow-style MLS** property search platform with a **React** frontend featuring filterable, paginated listings, detail pages with photos, maps, and open house schedules, **enabling faster agent workflows**.
- Engineered a **Node/Express REST API** backed by **MySQL 8 in Docker** seeded from real MLS datasets, with **end-to-end test coverage** via Jest, React Testing Library, and Supertest, **delivering a production-ready, fully tested backend**.

Triton Engineering Student Council (TESC)

San Diego, CA

Vice President Internal

November 2025 – Present

- Manage internal operations for a **15-person council** serving **5,300+ students**, acting as **primary liaison** to **10+ member organizations** and structuring recurring syncs that improved cross-org visibility into TESC decisions.

Triton Engineering Student Council (TESC)

San Diego, CA

Software Engineer

November 2025 – Present

- Implemented **GitHub Actions CI/CD** pipelines across **4+ repositories**, automating testing and deployment workflows to improve release reliability and developer efficiency.
- Developed reusable **React components**, event registration flows, and admin dashboards in a collaborative **3-engineer team**, improving cross-device responsiveness and reducing duplicated frontend code.

Computer Science and Engineering Society (CSES)

San Diego, CA

Design Coordinator | Board Member

April 2026 – Present

- Design and produce **Figma** assets — event graphics, marketing materials, and **UI components** — used across UCSD's largest CS org's events and outreach touchpoints.
- Organize and coordinate **design community events**, representing design in org-wide decisions and advocating for **visual standards** across thousands of members.

PROJECTS

Reeboot the Earth | *Python, FastAPI, Groq API, NASA FIRMS, ReportLab, Leaflet.js* | [GitHub](#)

June 2026

- Built a **6-agent wildfire advisory system** ingesting live **NASA FIRMS** and Open-Meteo data to generate **per-field evacuation plans** and ROI-ranked actions; presented to **Cisco leaders** at the AGENTCY meeting.
- Automated **USDA CCC-576 PDF pre-fill** via pypdf AcroForm mapping with **multilingual briefings in 10 languages** (Arabic RTL), served via **FastAPI** with a real-time **Leaflet** threat dashboard.

GroundZero | *XGBoost, ONNX, TypeScript, Python, Groq API, COCO-SSD* | [GitHub](#)

April 2026

- Trained an **XGBoost** wildfire risk classifier on **NOAA/MODIS** datasets, exported via **ONNX** for **browser inference**, and built a **dual-dashboard** (coordinator + field-user) with **COCO-SSD** detection and Groq voice briefings.

Decimal Careers | *Next.js, TypeScript, Groq API (LLaMA 3.3), CSS* | [GitHub](#)

January 2026

- Built a **full-stack AI career site** where users upload a resume, parsed via **LLM** to extract skills and seniority, then **scored 0–100** against open roles with **real-time re-ranking** and hard mismatch filtering.
- Implemented **AI resume tailoring** that analyzes candidate-role gaps and returns **5–7 actionable bullet rewrites** — deployed on **Vercel** with persistent session state via localStorage.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, HTML/CSS, SQL, C

Frameworks & Tools: React.js, Next.js, Node.js, Express, Tailwind CSS, Git, GitHub Actions, Figma, Docker, MySQL, Jest, Supertest, AWS, Full-stack Development, RESTful APIs, Postman, JSON, Shell Scripting

AI & Libraries: Groq API, XGBoost, ONNX, RAG Pipelines, Prompt Engineering, NumPy, ReportLab, FastAPI, GitHub Copilot, Cursor, Claude Code, OpenAI, Large Language Model(LLM's), Machine Learning, Codex, LLM APIs
